

We cleaned Nature...

As part of the Erasmus+ project “Shaping the Future: Environmental Education and Aesthetics” (SAFE), 6B cleaned the outdoor area of the main school of the Santos Simões School Group (Guimarães, Portugal) on 14th May 2026.

This activity was guided by Dr. Bruna Oliveira, Education for Sustainability Technician at the Landscape Laboratory, who kindly provided the support material.

The initiative aimed to raise students' awareness for the need to keep public spaces clean and well-maintained, promote environmental education and encourage the preservation of Nature.

By encouraging volunteering, the aim was also to make students understand the importance of teamwork and the fundamental role of active citizenship.

Finally, a round of applause goes to 6B, who demonstrated great enthusiasm and interest throughout the activity.
