

Workshop 5 – “Protect Our Seas” Recycling Workshop

Participants create sea animals, marine ecosystems, and environmental awareness posters using recyclable materials collected beforehand. Working in mixed international groups, students design creative eco-art products inspired by marine life and sustainability themes.

The workshop encourages participants to reflect on the importance of protecting seas and oceans from pollution while promoting environmentally responsible behaviors through hands-on activities.

Objectives

- Raising awareness about marine pollution
- Promoting recycling and sustainability
- Encouraging creativity and teamwork
- Supporting environmental education through art-based learning
- Developing collaborative and intercultural communication skills

Materials

- Plastic bottles and caps
- Cardboard and paper waste
- Recyclable packaging materials
- Glue, scissors, paint, and markers
- Natural decorative materials

Final Product

Marine-themed eco artworks and environmental posters displayed during the mobility activities and dissemination exhibitions.
